

THE CHALLENGE

Rapidly changing risks, from climate volatility to cyber attacks, expose the limits of **fragmented and siloed exposure data**. Without control and visibility into risk accumulation, decisions slow and **risk compounds**.

THE SOLUTION

ExposureHub turns siloed exposure data into a governed portfolio view, combining varied risk data elements, geocoding, data quality, and analytics so teams can monitor accumulation, assess emerging risks, and make faster, more confident decisions.

KEY CAPABILITIES

PORTFOLIO VISIBILITY

- Portfolio exposure views
- Geocoded portfolio maps
- Accumulation monitoring

→ FEWER UNEXPECTED LOSSES

DATA & PERFORMANCE

- Data quality controls
- Exceptional processing speeds
- Multi-entity client handling

→ FAST, RELIABLE INSIGHTS

MODELING & INTEGRATION

- Cat model integration
- Upstream/downstream integration
- Third-party integration

→ MORE INFORMED DECISIONS

ENTERPRISE CONTROL

- Multiple lines of business
- Configurable workflows
- Inward/outward reinsurance

→ SCALABLE EXPOSURE CONTROL

KEY VALUE

- See exposure across entities, perils, and lines
- Spot accumulation before risk compounds
- Move from large datasets to insight faster
- Connect exposure data to portfolio decisions
