

Presented at NeoProEd Insurance Conclave 2026, GIFT City

Building intelligent marketplaces for a **connected business world**

Ebix powers B2B digital ecosystems across insurance, finance, travel and healthcare, connecting brokers, carriers, agents and enterprises across 40+ countries with AI-driven technology.

FEATURED IN THIS BROCHURE

PlacingHub

Full-cycle electronic trading

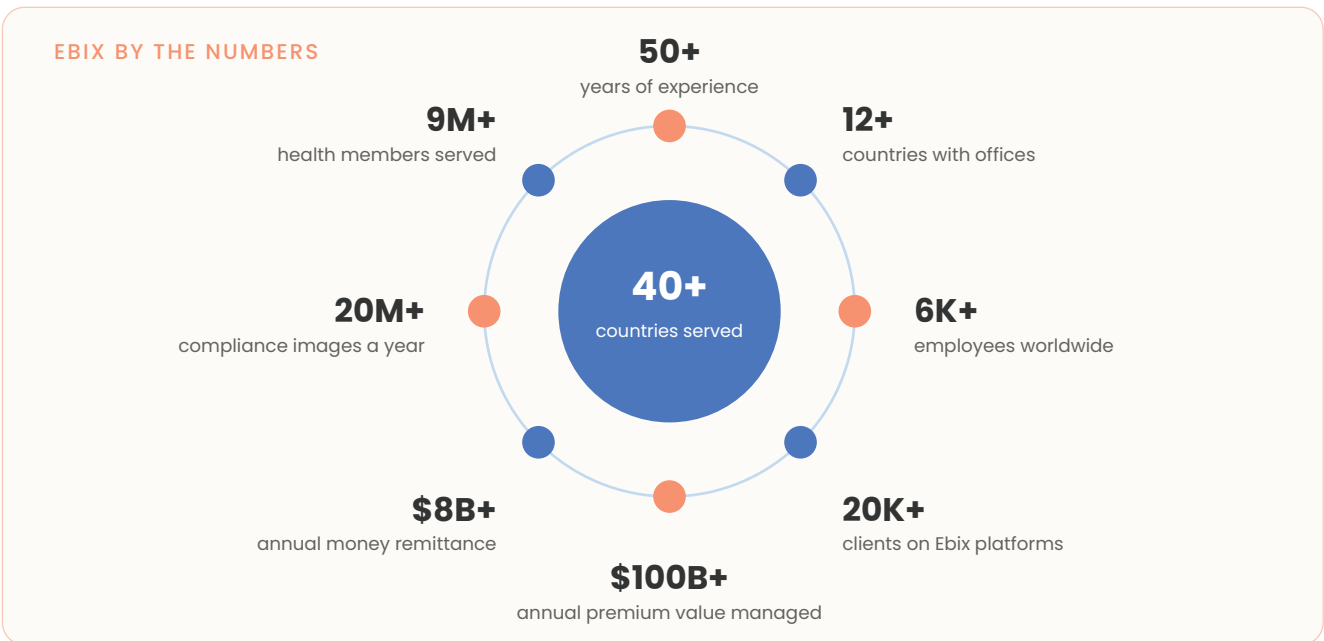

ExposureHub

Exposure management

50+ years engineering trust across global insurance and finance

Ebix operates AI-driven, API-first digital marketplaces that power commerce across insurance, fintech, and health industries worldwide. The Company's exchanges and platforms span health, life, and property & casualty insurance, risk and compliance management, fintech, and health content and wellness solutions. Through its services division, Ebix also delivers solutions in payments, forex, travel, and education under established global brands. Operating from twelve countries, Ebix serves clients across more than forty nations.

In insurance, that means brokers, MGAs, carriers, TPAs and regulators working with one AI-ready partner that grows with them.

Our B2B digital exchanges

 **Health Insurance & Employee Benefits**
Enrollment, eligibility, billing, claims and compliance on one AI-ready platform.

 **Life Insurance**
New business, underwriting, policy admin, commissions and claims for individual and group products.

 **Lending, Asset & Wealth Management**
Onboarding, advisory, portfolio management and compliance for banks and lenders.

 **Travel & Mobility**
High-velocity travel distribution for airlines, OTAs, consolidators and corporate travel.

 **Property & Casualty Insurance**
Real-time quoting, placement, binding and post-bind services for brokers, MGAs and carriers.

 **Risk Compliance & Management**
Certificates of insurance, automated workers' comp filing and claims monitoring.

 **Health Content & Wellness**
Consumer health content, digital wellness and accredited clinical education on one hub.

 **EbixONE**
The home for all Ebix AI initiatives, spanning every vertical above.

EBIX SERVICES

Operational services under industry-leading independent brands

Alongside its exchanges, Ebix runs payments, forex, travel and education businesses under their own market-leading identities: EbixCash for payments, remittance and forex; Via.com and Mercury for travel; Zillious for corporate travel technology; and Delphi for technology consulting. Independent in name, backed by the scale of Ebix.

Purpose-built exchanges for every line of insurance

Four exchanges from one company cover the insurance value chain end to end. Each is built around a job the market needs done and the people who do it.

Property & Casualty

Brokers MGAs Carriers Reinsurers

- Quote, place, bind and endorse in real time
- Connect brokers and insurers without point-to-point links
- Administer policies across lines and countries
- Settle accounts and claims to market standards

Risk Compliance & Management

Brokers Enterprises Risk teams

- Track and verify certificates of insurance
- Read policies and contracts with AI to find coverage gaps
- Run claims, incidents and exposures in a full RMIS
- Automate workers' comp filing and claims monitoring
- See portfolio risk and total cost of risk

Health Insurance & Benefits

Health plans TPAs Brokers Employers

- Quote, enroll and issue on one platform
- Run eligibility, billing and claims end to end
- Give brokers and employers self-service portals
- Stay compliant with built-in rules

Life Insurance

Carriers Distributors Agents

- Process new business and underwriting digitally
- Administer individual and group policies
- Distribute through multiple carriers and channels
- Manage commissions, billing and claims

POWERED BY

Distribute: Sunrise Exchange, iClose, Surety Insurance · Place: PlacingHub, ContractBuilder · Underwrite: iClose, ExposureHub · Administer: EbixEvolution, EbixASP, WinBEAT · Settle: PostBind, EbixExchange · Manage risk: ExposureHub, ExposureHub Analytics

FEATURED PRODUCT

One platform. Submission to settlement.

PlacingHub takes the whole placement lifecycle online: submission, quote, negotiation, bind, endorsement, renewal, and the post-bind accounting, settlement and claims that follow. Brokers and underwriters work in their own portals or through APIs from their own systems, with all workflow, functionality and data on one secure SaaS platform in Azure.

Faster placement

Digital and accurate, from first submission to bound risk.

Better client service

One view of every risk, endorsement and document.

Lower operating costs

Less rekeying, fewer errors, reduced E&O exposure.

Fewer disputes

Shared data and a shared audit trail between counterparties.

Faster settlement

Eradicate unallocated cash with structured post-bind data.

Secure and robust

Secure, robust SaaS platform hosted in Azure.

Three stages. One platform.

Submission

ContractBuilder

Data-first submission. Build any insurance document digitally, negotiate it online and export it as structured data or a finished contract.

- Re/insurance and delegated authority, any line of business
- Fully aligned with ACORD Global GRLC Standards
- API or manual data entry
- Export as JSON, Word or PDF
- Document-first path for analogue risks

Electronic placing

ElectronicPlacing

Quote, negotiate, bind, endorse and renew any line of business in a multilingual, intuitive interface.

- Multi-layered programmes
- Multi-sectioned risks
- Open market and facility risks
- Co-insurance, vertical and BIPAR
- Signed lines and evidence of cover produced on-platform

Post-bind

PostBind

Distribute technical accounts, financial accounts and claims data to carriers, with straight-through processing where you want it.

- Global standard ACORD GRLC
- eBot/eCot Rüschlikon data
- Intuitive carrier portal
- API option for STP and accounting automation
- Any currency
- Integration option to ETASS, India's market-wide risk register

NEW FOR 2026

AI inside the workflow

- Email submission directly into broker workflow
- Structured summaries of contracts and schedules for submissions
- Anomaly detection for incomplete or inconsistent submissions
- Contract data extraction into ContractBuilder, for example at renewal
- Similar-risk identification for benchmarking and pricing
- Workflow support: triage, routing and prioritisation

FEATURED PRODUCT

See the exposure you have written.

ExposureHub is a fully configurable exposure management platform that puts insurers and reinsurers in control of their data. Results are delivered fast, accurately and transparently, with every related data point available instantly across lines of business and reinsurance programmes.

Your data, in your control

ExposureHub is module-based and entirely configurable to each client, and can be customised to individual users' requirements and preferences. Users are in control of the platform, not the platform in control of the user. The layout draws the user into their exposure data, making it easier to identify and act on insights, opportunities and outliers.

Speed at scale

- Exceptional processing speed at very large data volumes
- Results delivered fast, accurately and transparently
- Every related data point available instantly

Geospatial insight

- Interactive global map displays
- Geocoding and visual portfolio modelling
- AI-driven risk analytics for insurers and brokers (ExposureHub Analytics, part of EbixONE)

Breadth of coverage

- Multiple lines of business and multi-entity clients
- Inwards and outwards reinsurance

Open by design

- Complements catastrophe models; integrates upstream and downstream
- Data in via import files or integration with market systems
- Third-party connections for location data augmentation

Built for every user

- Intuitive navigation for experienced exposure managers and non-expert users alike
- Market-leading support from people who understand your challenges
- Configured per client, customised per user

Deploy your way

- Deploy in-house, in the Ebix private cloud, or on public cloud

WHO IT IS FOR

Insurers, reinsurers and MGAs who need a real-time view of aggregated exposure across portfolios, programmes and entities, and who want the platform to work the way their exposure team works, rather than the other way round. For GIFT City reinsurance entities, ExposureHub brings exposure discipline from day one.

Proven at scale. Present where you operate.

One connected exchange model

Spanning quoting through claims, instead of stitched-together point tools.

50+ years of insurance domain depth

Built into every product and every AI capability we ship.

Independent and open

Neutral exchanges open to any broker, insurer or reinsurer, not controlled by a single market participant.

Proven at scale

\$100B+ in annual premium value already running on Ebix platforms.

Global footprint, local support

40+ countries served, with teams in India, the UK, Australia, Brazil and the USA.

Deploy your way

In-house, Ebix private cloud or public cloud, with APIs for everything downstream.

EBIXONE

One intelligence. All platforms.

EbixONE is the unified home of Ebix's AI and automation vision: guided automation, intelligent compliance, document processing and real-time risk insight, built into the exchanges insurance teams already use.

› Insurance Renewal AI

Automates data extraction and quote tracking across carriers for commercial property renewals.

› TCOR Intelligence

Analyses coverage gaps and recommends cost-reduction strategies for total cost of risk.

› Quoting & Rating AI

Modernises multi-carrier health quoting with AI interfaces built for peak performance.

› ExposureHub Analytics

Geocoding, visual portfolio modelling and AI-driven risk analytics for insurers and brokers.

› Intelligent Compliance Bots

AI-powered bots give instant support on complex deficiency and compliance questions.

› AI-Powered Data Extraction

Replaces manual entry by auto-populating system data straight from incoming PDF forms.

Governed autonomy

Systems act within defined rules and compliance boundaries.

Integrated intelligence

Agents that work across platforms, not isolated point solutions.

Domain expertise

AI backed by business logic, not generic models.
