

A connected intelligence layer built to surface vendor risk across contracts, policies, financials, and exposures.

THE CHALLENGE

COI programs confirm coverage exists—but **contract language, policy exclusions,** and **financial risk** live in documents and data no one reviews until a claim strikes. Without visibility, risk teams are left uninformed and exposed.

THE SOLUTION

Lens Suite extends your Ebix COI program with four intelligence modules designed to close the gaps certificates can't see—giving risk teams real visibility into contracts, policies, financials, and exposures while there is still time to act.

INTELLIGENCE MODULES

CONTRACT LENS

- Contract obligation extraction
- Contract-term validation
- Defensible coverage decisions

→ REDUCED CONTRACT RISK

POLICY LENS

- Full policy document analysis
- Policy exclusions & endorsements
- Cited coverage findings

→ GAP-FREE COVERAGE

FINANCIAL LENS

- Financial analysis & risk signals
- OFAC, DUN, LexisNexis Integration
- Subcontractor Health & Risk Rating

→ LOWER FINANCIAL RISK

EXPOSURE LENS (COMING SOON)

- Vendor exposure modeling
- Concentration risk before events
- Executive and carrier reporting

→ EXPOSURE CONTROL

KEY VALUE

- Mitigate the full scope of vendor risk
- Validate against actual contract terms
- Surface policy exclusions before claims
- Monitor vendor financial health and risk
- Model portfolio-wide vendor exposure
