

THE CHALLENGE

Risk programs built on **disconnected systems** and siloed operations create fragmented risk intelligence, gaps in cost control, and **rising exposure**. Without a unified risk operating system, teams spend more time chasing risk than managing it.

THE SOLUTION

RiskEnvision brings claims, exposures, compliance, and financial risk data into one operating picture—connecting the data that drives Total Cost of Risk, loss forecasting, and enterprise risk strategy. From execution to oversight—without the lift.

KEY CAPABILITIES

CLAIMS & INCIDENTS

- Unified claims and risk view
- Safety & Incident Intake Module
- Reserve & Litigation Management

→ **STRONGER RISK CONTROL**

TCOR & FINANCIALS

- Total Cost of Risk visibility
- Loss control workflows
- Asset management

→ **LOWER TOTAL COST OF RISK**

RISK ANALYTICS & AUTOMATION

- Configurable risk dashboards
- Report automation
- Automated business rules engine

→ **REDUCED MANUAL EFFORT**

ERM & INTEGRATION

- ERM collaboration frameworks
- Compliance data integration
- Carrier, TPA, and ERP data feeds

→ **INFORMED DECISION**

KEY VALUE

- See total cost of risk in one place
- Connect risk strategy to operational data
- Act on trends before they become losses
- Implement fast, adopt easily
- Scale from mid-market to enterprise automatically
