

THE CHALLENGE

WC EDI compliance gaps are easy to miss—and costly to ignore. **Missed filings**, rejected transactions, and manual processes overwhelm teams, creating **penalties and audit risk** that compound over time.

THE SOLUTION

wcExchange replaces error-prone EDI processes with automation that generates, validates, and submits FROI/SROI from claims data. EDI feedback surfaces in your claims workflow — fewer rejections, zero missed deadlines, full compliance.

KEY CAPABILITIES

AUTOMATED EDI FILING

- Auto-triggered FROI/SROI filings
- Claims system integration
- All-state jurisdictional coverage

→ HANDS-OFF FILING

COMPLIANCE & VALIDATION

- Pre-validation against state rules
- Edit checks and sequencing logic
- Audit-ready transaction records

→ COMPLIANCE CONFIDENCE

WORKFLOW & CONTROL

- Flexible automation levels
- Exception routing and handling
- Configurable submission rules

→ MORE INFORMED DECISIONS

VISIBILITY & TRACKING

- Real-time submission status
- Full transaction history and audit trail
- Native claims system integration

→ REAL-TIME VISIBILITY

KEY VALUE

- Reduce rejected filings
- Mitigate regulatory risk
- Eliminate reporting gaps
- Drive operational efficiency

HOW IT WORKS

1 Claim data entered or updated

2 Reportable events identified

3 Transactions auto generated

4 Pre-validated against state rules

5 Submitted to state agencies

6 Real-time feedback and error resolution
