

EbixForms

EbixForms uses electronic ACORD Forms for entry of data by an Agent/Broker for submission to Carriers and MGAs. XML Data is separated from the electronic form for submission of information. Insurers can automatically consume the data to expedite processing of quotes and issuance.

Benefits

- Eliminate Keystrokes
- Ensure compliance
- Speed quoting and binding
- Validate data at time of entry
- Provide collaboration between Agents, Brokers, Carriers and MGAs
- Eliminate form update maintenance

For the Agent/Broker

- Automatically pull down the most recent version of ACORD Forms
- Utilizes agent-familiar ACORD Forms
- Data entry is direct into the electronic form
- Package policies requiring numerous forms populate like-data across all forms
- Promotes upload & download capabilities

For the Carrier/MGA

- Provide agents/brokers with an alternative data entry to your web portal
- Add custom fields and forms
- Add real-time field validation to ensure proper data entry
- Automatically consume data from the field without keying data
- Forms update automatically remapping data fields to appropriate real
